

To study isospin breaking decay $\eta(1405) \rightarrow f_0(980)\pi^0 \rightarrow 3\pi$

Thursday, 18 June 2015 11:35 (0:15)

Content

We elucidate the possible mechanism of the isospin breaking decay $\eta(1405) \rightarrow f_0(980)\pi^0 \rightarrow \pi^+\pi^-\pi^0$.
