

# Photon 2015

## Monday 15 June 2015

### Higgs and photons, electroweak and new physics (09:10-11:55)

**-Conveners: Uri Karshon**

time	[id] title	presenter
09:10	[92] Higgs studies, present and future	Prof. DE ROECK, Albert
09:35	[59] Highlights from the ATLAS experiment	Dr KRASZNAHORKAY, Attila
10:05	[95] Highlights from the CMS experiment	Prof. SAFONOV, Alexei
10:35	Coffee	
11:05	[30] Latest results on Higgs final-states with photons in ATLAS	Dr YAMAGUCHI, Yohei
11:30	[43] Latest results on Higgs final-states with photons in CMS	Mr TAO, Junquan

### Higgs and photons, electroweak and new physics (13:30-16:55)

**-Conveners: Albert De Roeck**

time	[id] title	presenter
13:30	[90] Latest results on anomalous gauge couplings in ATLAS	Dr SCHNOOR, Ulrike
13:55	[62] Latest results on anomalous gauge couplings in CMS	Mrs AVDEEVA, Ekaterina
14:20	[37] Results on isolated photon, photon+jet and diphoton production in ATLAS	Dr ESCALIER, Marc
14:45	Coffee	
15:15	[20] Diphoton production at NNLO at the LHC	Dr CIERI, Leandro
15:35	[60] Higgs and photons	Prof. KRAWCZYK, Maria
15:55	[10] Two-photon Higgs width and triple Higgs coupling in 2HDM in SM-like scenario	Prof. GINZBURG, Ilya
16:15	[52] New physics possibilities in photon-induced interactions at the LHC	Prof. GONCALVES, Victor Paulo
16:35	[61] Searches for Dark Forces at e+e- Colliders	Dr CURCIARELLO, Francesca
