

Response Letter

These are the corrections made, according to comments from reviewing team:

1. The abstract was shortened.
2. The explanation of such a specific geometry of LOS was added in “Experimental Setup” part.
3. The first appearance of “LOS” abbreviation was corrected.
4. Some summary was added at the end of “Calibration Results” part. Also, all equations were numbered.
5. The paragraph added to the “Experimental Setup” and “Summary” added at the end of the article should clear the situation.

Yours respectfully,

Yakov Borissenko.
