Instrumentation for Colliding Beam Physics (INSTR-17)

Monday 27 February 2017

Colliders and detector integration (14:30-17:20)

- Conveners: Dr. Denisov, Dmitri

time	title	presenter
14:30	Laser backscattering for beam energy calibration in collider experiments. Recent results.	MUCHNOI, Nikolai
14:50	Beam energy measurement system at BEPCII	ZHANG, Jianyong
15:10	Luminosity measurements at LHCb	BALAGURA, Vladislav
15:30	The KLOE-2 High Energy Taggers	CURCIARELLO, Francesca
15:50	Scintillating Fibre Detector for the Mu3e Experiment	CORRODI, Simon
16:10	Coffee break	
16:40	Optimization of the beam crossing angle at the ILC for e+e- and gamma-gamma collisions	TELNOV, Valery
17:00	The Fermilab Muon g-2 experiment: laser calibration system	KARUZA, Marin
