

The 6th International symposium on Negative Ions, Beams and Sources (NIBS'18)

Tuesday 04 September 2018

Poster Session #2 (15:30-18:00)

[id] title	presenter	board
[30] Design of the RF Negative Hydrogen Ion Source at HUST	Mr ZUO, Chen	32
[103] Towards efficient integration of cusp and dipole filter magnets in a compact H- source	Dr BALTADOR, Carlo	33
[61] Gasdynamic ECR ion source for negative ion production	Mr LAPIN, Roman	34
[112] Graphical representations of spectral data of negative ions	Mr KAZAKOV, Vladislav	35
[6] Carbon Film in Radio Frequency Surface Plasma Source with Cesium	Prof. DUDNIKOV, Vadim	36
[10] Polarized negative ion source with multiply spherically focusing surface plasma ionizer	Prof. DUDNIKOV, Vadim	37
[4] Ultracold Muonium Negative Ion Production	Prof. DUDNIKOV, Vadim	38
[23] H-minus ion source emittance measuring device	Mr KLENOV, Viktor	39
[24] Injection of Atomic Hydrogen from a Thermal Cracker Cell to Plasma Grid Surface of H- Ion Source	Mr SHIMABUKURO, Yuji	40
[52] Design of Negative Ion Source Using a Plasma Electrode of C12A7 Electride	Mr KOBAYASHI, Masumi	41
[33] Measurement of Negative Carbon Ions near a Plasma Deposited Carbon Thin Film by Laser Photodetachment	Mr IKEDA, Yuito	42
[48] Beam Current Stability Improvements of Negative Carbon Ions in a Multi-Cusp Ion Source	Mr MELANSON, Stephane	43
[105] Sputter negative ion source at BINP Accelerator Mass Spectrometer	Mr KONSTANTINOV, Eugene	44
[94] Improving the transported negative ion beam current in NIO1	Dr SARTORI, Emanuele	45
[99] Langmuir probe analysis in negative ion beams	Dr SARTORI, Emanuele	46
[69] Beam steering characteristics of ferromagnetic electrode	Dr NAKANO, Haruhisa	47
[106] Measurement of the space charge effect of a negative hydrogen ion beam.	Mr KOLESNIKOV, Iaroslav	48
[21] Measurement of the negative ion beam with D-Pace OWS-30 wire scanner	Mr BYKOV, Timofey	49
[17] A plasma target for neutralization of the negative ion beam	Mr EMELEV, Ivan	50
[109] Damage simulations for large laser mirrors of laser neutralizer under proton and deuterons bombarding.	Mr ATLUKHANOV, Magomedrizy	51
[22] Secondary Electrons Problem Study for Beam Energy Recovery for Fusion: Experimental apparatus	Dr VARIANTE, Vincenzo	52
[78] MITICA Intermediate Electrostatic Shield: concept design, development and first experimental tests identification	Dr PATTON, Tommaso	53
[16] Development of Radio frequency based negative ion source test bed	Prof. HU, Chundong	54

[2] Concept of plasma heating and current drive neutral beam system for fusion neutron source "DEMO-FNS"

Dr ANANYEV, Sergey

55
